

## Percentage Change Multiplier (A)

What is the multiplier for decrease a number by 46%?

What is the multiplier for increase a number by 28%?

What is the multiplier for decrease a number by 9%?

What is the multiplier for increase a number by 13%?

What is the multiplier for decrease a number by 70%?

What is the multiplier for increase a number by 9%?

## Percentage Change Multiplier (B)

What is the multiplier for decrease a number by 30%?

What is the multiplier for increase a number by 51%?

What is the multiplier for decrease a number by 31%?

What is the multiplier for decrease a number by 25%?

What is the multiplier for increase a number by 2%?

What is the multiplier for increase a number by 1%?

## Percentage Change Multiplier (C)

What is the multiplier for increase a number by 55%?

What is the multiplier for increase a number by 9%?

What is the multiplier for decrease a number by 13%?

What is the multiplier for increase a number by 60%?

What is the multiplier for decrease a number by 29%?

What is the multiplier for decrease a number by 3%?

## Percentage Change Multiplier (D)

What is the multiplier for increase a number by 9%?

What is the multiplier for decrease a number by 60%?

What is the multiplier for increase a number by 63%?

What is the multiplier for decrease a number by 26%?

What is the multiplier for decrease a number by 3%?

What is the multiplier for increase a number by 30%?

## Percentage Change Multiplier (E)

What is the multiplier for decrease a number by 23%?

What is the multiplier for decrease a number by 62%?

What is the multiplier for increase a number by 11%?

What is the multiplier for increase a number by 10%?

What is the multiplier for decrease a number by 8%?

What is the multiplier for increase a number by 68%?

## Percentage Change Multiplier (F)

What is the multiplier for decrease a number by 50%?

What is the multiplier for increase a number by 12%?

What is the multiplier for increase a number by 8%?

What is the multiplier for decrease a number by 70%?

What is the multiplier for decrease a number by 1%?

What is the multiplier for increase a number by 24%?

## Percentage Change Multiplier (G)

What is the multiplier for increase a number by 31%?

What is the multiplier for increase a number by 15%?

What is the multiplier for increase a number by 12%?

What is the multiplier for decrease a number by 60%?

What is the multiplier for decrease a number by 3%?

What is the multiplier for decrease a number by 8%?

## Percentage Change Multiplier (H)

What is the multiplier for decrease a number by 63%?

What is the multiplier for increase a number by 1%?

What is the multiplier for increase a number by 23%?

What is the multiplier for increase a number by 12%?

What is the multiplier for decrease a number by 5%?

What is the multiplier for decrease a number by 38%?

## Percentage Change Multiplier (I)

What is the multiplier for increase a number by 5%?

What is the multiplier for decrease a number by 21%?

What is the multiplier for decrease a number by 52%?

What is the multiplier for decrease a number by 39%?

What is the multiplier for increase a number by 7%?

What is the multiplier for increase a number by 25%?

## Percentage Change Multiplier (J)

What is the multiplier for increase a number by 28%?

What is the multiplier for decrease a number by 31%?

What is the multiplier for increase a number by 3%?

What is the multiplier for decrease a number by 28%?

What is the multiplier for increase a number by 1%?

What is the multiplier for decrease a number by 68%?
