

## Percentage Change Multiplier (A)

Find the multiplier used to decrease a number by 7%.

Find the multiplier used to increase a number by 40%.

Find the multiplier used to increase a number by 8%.

Find the multiplier used to increase a number by 11%.

Find the multiplier used to decrease a number by 70%.

Find the multiplier used to decrease a number by 21%.

## Percentage Change Multiplier (B)

Find the multiplier used to increase a number by 5%.

Find the multiplier used to decrease a number by 1%.

Find the multiplier used to decrease a number by 20%.

Find the multiplier used to decrease a number by 65%.

Find the multiplier used to increase a number by 45%.

Find the multiplier used to increase a number by 16%.

## Percentage Change Multiplier (C)

Find the multiplier used to decrease a number by 21%.

Find the multiplier used to increase a number by 5%.

Find the multiplier used to increase a number by 54%.

Find the multiplier used to decrease a number by 17%.

Find the multiplier used to decrease a number by 31%.

Find the multiplier used to increase a number by 3%.

## Percentage Change Multiplier (D)

Find the multiplier used to increase a number by 25%.

Find the multiplier used to decrease a number by 20%.

Find the multiplier used to decrease a number by 67%.

Find the multiplier used to decrease a number by 7%.

Find the multiplier used to increase a number by 67%.

Find the multiplier used to increase a number by 5%.

## Percentage Change Multiplier (E)

Find the multiplier used to increase a number by 8%.

Find the multiplier used to increase a number by 17%.

Find the multiplier used to decrease a number by 13%.

Find the multiplier used to decrease a number by 52%.

Find the multiplier used to increase a number by 38%.

Find the multiplier used to decrease a number by 9%.

## Percentage Change Multiplier (F)

Find the multiplier used to decrease a number by 11%.

Find the multiplier used to increase a number by 23%.

Find the multiplier used to increase a number by 9%.

Find the multiplier used to decrease a number by 8%.

Find the multiplier used to increase a number by 54%.

Find the multiplier used to decrease a number by 56%.

## Percentage Change Multiplier (G)

Find the multiplier used to decrease a number by 33%.

Find the multiplier used to increase a number by 9%.

Find the multiplier used to increase a number by 11%.

Find the multiplier used to increase a number by 29%.

Find the multiplier used to decrease a number by 10%.

Find the multiplier used to decrease a number by 64%.

## Percentage Change Multiplier (H)

Find the multiplier used to increase a number by 7%.

Find the multiplier used to decrease a number by 27%.

Find the multiplier used to decrease a number by 29%.

Find the multiplier used to increase a number by 34%.

Find the multiplier used to decrease a number by 46%.

Find the multiplier used to increase a number by 5%.

## Percentage Change Multiplier (I)

Find the multiplier used to decrease a number by 44%.

Find the multiplier used to decrease a number by 8%.

Find the multiplier used to increase a number by 30%.

Find the multiplier used to increase a number by 3%.

Find the multiplier used to increase a number by 57%.

Find the multiplier used to decrease a number by 22%.

## Percentage Change Multiplier (J)

Find the multiplier used to increase a number by 16%.

Find the multiplier used to decrease a number by 20%.

Find the multiplier used to decrease a number by 32%.

Find the multiplier used to increase a number by 10%.

Find the multiplier used to decrease a number by 6%.

Find the multiplier used to increase a number by 55%.
