

Solutions – Missing Angles (A)

Two angles combine to make a right angle. One of the angles is 38° .

What is the other angle?

52°

Two angles combine to make a straight angle. One of the angles is 160° . What is the other angle?

20°

Two angles combine to make a straight angle. One of the angles is 77° .

What is the other angle?

103°

Two angles combine to make a full angle. One of the angles is 32° .

What is the other angle?

328°

Two angles combine to make a full angle. One of the angles is 340° .

What is the other angle?

20°

Two angles combine to make a right angle. One of the angles is 11° .

What is the other angle?

79°

Solutions – Missing Angles (B)

Two angles combine to make a right angle. One of the angles is 19° .

What is the other angle?

71°

Two angles combine to make a full angle. One of the angles is 268° .

What is the other angle?

92°

Two angles combine to make a right angle. One of the angles is 75° .

What is the other angle?

15°

Two angles combine to make a full angle. One of the angles is 261° .

What is the other angle?

99°

Two angles combine to make a straight angle. One of the angles is 82° .

What is the other angle?

98°

Two angles combine to make a straight angle. One of the angles is 98° .

What is the other angle?

82°

Solutions – Missing Angles (C)

Two angles combine to make a right angle. One of the angles is 13° .

What is the other angle?

77°

Two angles combine to make a straight angle. One of the angles is 96° .

What is the other angle?

84°

Two angles combine to make a full angle. One of the angles is 158° .

What is the other angle?

202°

Two angles combine to make a full angle. One of the angles is 83° .

What is the other angle?

277°

Two angles combine to make a straight angle. One of the angles is 176° . What is the other angle?

4°

Two angles combine to make a right angle. One of the angles is 12° .

What is the other angle?

78°

Solutions – Missing Angles (D)

Two angles combine to make a right angle. One of the angles is 71° .

What is the other angle?

19°

Two angles combine to make a straight angle. One of the angles is 137° . What is the other angle?

43°

Two angles combine to make a right angle. One of the angles is 60° .

What is the other angle?

30°

Two angles combine to make a full angle. One of the angles is 325° .

What is the other angle?

35°

Two angles combine to make a straight angle. One of the angles is 74° .

What is the other angle?

106°

Two angles combine to make a full angle. One of the angles is 285° .

What is the other angle?

75°

Solutions – Missing Angles (E)

Two angles combine to make a full angle. One of the angles is 183° .

What is the other angle?

177°

Two angles combine to make a full angle. One of the angles is 263° .

What is the other angle?

97°

Two angles combine to make a straight angle. One of the angles is 145° . What is the other angle?

35°

Two angles combine to make a straight angle. One of the angles is 91° .

What is the other angle?

89°

Two angles combine to make a right angle. One of the angles is 25° .

What is the other angle?

65°

Two angles combine to make a right angle. One of the angles is 78° .

What is the other angle?

12°

Solutions – Missing Angles (F)

Two angles combine to make a right angle. One of the angles is 18° .

What is the other angle?

72°

Two angles combine to make a straight angle. One of the angles is 28° .

What is the other angle?

152°

Two angles combine to make a full angle. One of the angles is 320° .

What is the other angle?

40°

Two angles combine to make a straight angle. One of the angles is 10° .

What is the other angle?

170°

Two angles combine to make a right angle. One of the angles is 7° .

What is the other angle?

83°

Two angles combine to make a full angle. One of the angles is 202° .

What is the other angle?

158°

Solutions – Missing Angles (G)

Two angles combine to make a full angle. One of the angles is 181° .

What is the other angle?

179°

Two angles combine to make a straight angle. One of the angles is 55° .

What is the other angle?

125°

Two angles combine to make a full angle. One of the angles is 303° .

What is the other angle?

57°

Two angles combine to make a right angle. One of the angles is 36° .

What is the other angle?

54°

Two angles combine to make a right angle. One of the angles is 62° .

What is the other angle?

28°

Two angles combine to make a straight angle. One of the angles is 148° . What is the other angle?

32°

Solutions – Missing Angles (H)

Two angles combine to make a straight angle. One of the angles is 79° .
What is the other angle?

101°

Two angles combine to make a straight angle. One of the angles is 165° . What is the other angle?

15°

Two angles combine to make a full angle. One of the angles is 119° .
What is the other angle?

241°

Two angles combine to make a right angle. One of the angles is 87° .
What is the other angle?

3°

Two angles combine to make a full angle. One of the angles is 168° .
What is the other angle?

192°

Two angles combine to make a right angle. One of the angles is 82° .
What is the other angle?

8°

Solutions – Missing Angles (I)

Two angles combine to make a full angle. One of the angles is 28° .

What is the other angle?

332°

Two angles combine to make a straight angle. One of the angles is 147° . What is the other angle?

33°

Two angles combine to make a straight angle. One of the angles is 31° .

What is the other angle?

149°

Two angles combine to make a right angle. One of the angles is 65° .

What is the other angle?

25°

Two angles combine to make a right angle. One of the angles is 69° .

What is the other angle?

21°

Two angles combine to make a full angle. One of the angles is 211° .

What is the other angle?

149°

Solutions – Missing Angles (J)

Two angles combine to make a full angle. One of the angles is 16° .

What is the other angle?

344°

Two angles combine to make a right angle. One of the angles is 43° .

What is the other angle?

47°

Two angles combine to make a straight angle. One of the angles is 115° . What is the other angle?

65°

Two angles combine to make a full angle. One of the angles is 152° .

What is the other angle?

208°

Two angles combine to make a straight angle. One of the angles is 130° . What is the other angle?

50°

Two angles combine to make a right angle. One of the angles is 34° .

What is the other angle?

56°
