

Solutions – Two-Way Tables (A)

Complete the table below. Then find the total number of people who chose car.

	Car	Bike	Total
City	8	15	23
Village	15	12	27
Total	23	27	50

23

Complete the table below. Then find how many more children than adults chose tea.

	Tea	Coffee	Total
Adults	5	6	11
Children	11	9	20
Total	16	15	31

6

Complete the table below. Then find the number of people who chose bus in the morning.

	Bus	Train	Total
Morning	14	13	27
Evening	13	10	23
Total	27	23	50

14

Solutions – Two-Way Tables (B)

Complete the table below. Then find the total number of people who chose train.

	Bus	Train	Total
Morning	10	10	20
Evening	14	6	20
Total	24	16	40

16

Complete the table below. Then find the difference between the number of people who chose bike in the city and the village.

	Car	Bike	Total
City	7	11	18
Village	13	7	20
Total	20	18	38

4

Complete the table below. Then find the number of boys who chose football.

	Football	Basketball	Total
Boys	7	12	19
Girls	8	5	13
Total	15	17	32

7

Solutions – Two-Way Tables (C)

Complete the table below. Then find the difference between the number of people who chose bus in the morning and the evening.

	Bus	Train	Total
Morning	7	5	12
Evening	8	8	16
Total	15	13	28

1

Complete the table below. Then find the total number of people who chose car.

	Car	Bike	Total
City	7	6	13
Village	11	10	21
Total	18	16	34

18

Complete the table below. Then find the number of people in Class A who chose maths.

	Maths	Science	Total
Class A	10	14	24
Class B	8	13	21
Total	18	27	45

10

Solutions – Two-Way Tables (D)

Complete the table below. Then find how many more boys than girls chose basketball.

	Football	Basketball	Total
Boys	11	13	24
Girls	12	10	22
Total	23	23	46

3

Complete the table below. Then find the number of people who chose train in the morning.

	Bus	Train	Total
Morning	13	14	27
Evening	12	13	25
Total	25	27	52

14

Complete the table below. Then find the total number of people who chose bike.

	Car	Bike	Total
City	15	15	30
Village	8	13	21
Total	23	28	51

28

Solutions – Two-Way Tables (E)

Complete the table below. Then find the number of people who chose bus in the morning.

	Bus	Train	Total
Morning	10	8	18
Evening	15	14	29
Total	25	22	47

10

Complete the table below. Then find the total number of people who chose car.

	Car	Bike	Total
City	6	9	15
Village	9	12	21
Total	15	21	36

15

Complete the table below. Then find how many more children than adults chose coffee.

	Tea	Coffee	Total
Adults	8	11	19
Children	14	13	27
Total	22	24	46

2

Solutions – Two-Way Tables (F)

Complete the table below. Then find the difference between the number of people who chose science in Class A and Class B.

	Maths	Science	Total
Class A	7	14	21
Class B	14	10	24
Total	21	24	45

4

Complete the table below. Then find the total number of people who chose pizza.

	Pizza	Burger	Total
Students	9	14	23
Teachers	12	10	22
Total	21	24	45

21

Complete the table below. Then find the number of adults who chose tea.

	Tea	Coffee	Total
Adults	15	10	25
Children	9	12	21
Total	24	22	46

15

Solutions – Two-Way Tables (G)

Complete the table below. Then find the total number of people who chose football.

	Football	Basketball	Total
Boys	10	10	20
Girls	6	7	13
Total	16	17	33

16

Complete the table below. Then find the difference between the number of people who chose maths in Class A and Class B.

	Maths	Science	Total
Class A	7	14	21
Class B	12	10	22
Total	19	24	43

5

Complete the table below. Then find the number of people who chose train in the morning.

	Bus	Train	Total
Morning	7	10	17
Evening	9	12	21
Total	16	22	38

10

Solutions – Two-Way Tables (H)

Complete the table below. Then find the total number of people who chose bus.

	Bus	Train	Total
Morning	6	6	12
Evening	5	8	13
Total	11	14	25

11

Complete the table below. Then find the number of boys who chose basketball.

	Football	Basketball	Total
Boys	14	9	23
Girls	10	6	16
Total	24	15	39

9

Complete the table below. Then find how many more students than teachers chose burger.

	Pizza	Burger	Total
Students	14	14	28
Teachers	6	5	11
Total	20	19	39

9

Solutions – Two-Way Tables (I)

Complete the table below. Then find the total number of people who chose science.

	Maths	Science	Total
Class A	5	10	15
Class B	15	6	21
Total	20	16	36

16

Complete the table below. Then find the number of people who chose bike in the city.

	Car	Bike	Total
City	8	8	16
Village	11	12	23
Total	19	20	39

8

Complete the table below. Then find how many more children than adults chose coffee.

	Tea	Coffee	Total
Adults	8	10	18
Children	10	14	24
Total	18	24	42

4

Solutions – Two-Way Tables (J)

Complete the table below. Then find how many more children than adults chose tea.

	Tea	Coffee	Total
Adults	13	15	28
Children	15	6	21
Total	28	21	49

2

Complete the table below. Then find the total number of people who chose maths.

	Maths	Science	Total
Class A	8	15	23
Class B	5	7	12
Total	13	22	35

13

Complete the table below. Then find the number of boys who chose football.

	Football	Basketball	Total
Boys	12	14	26
Girls	13	11	24
Total	25	25	50

12
