

Perimeter of a Circle (A)

A circle has radius 13 cm. Find the perimeter in terms of π .

A circle has radius 12 cm. Find the perimeter in terms of π .

A circle has radius 10 m. Find the perimeter in terms of π .

A circle has radius 7 mm. Find the perimeter in terms of π .

A circle has radius 20 mm. Find the perimeter in terms of π .

A circle has radius 16 m. Find the perimeter in terms of π .

Perimeter of a Circle (B)

A circle has radius 16 mm. Find the perimeter in terms of π .

A circle has radius 9 m. Find the perimeter in terms of π .

A circle has radius 4 cm. Find the perimeter in terms of π .

A circle has radius 5 mm. Find the perimeter in terms of π .

A circle has radius 3 cm. Find the perimeter in terms of π .

A circle has radius 11 m. Find the perimeter in terms of π .

Perimeter of a Circle (C)

A circle has radius 14 mm. Find the perimeter in terms of π .

A circle has radius 2 cm. Find the perimeter in terms of π .

A circle has radius 1 mm. Find the perimeter in terms of π .

A circle has radius 12 cm. Find the perimeter in terms of π .

A circle has radius 17 m. Find the perimeter in terms of π .

A circle has radius 3 m. Find the perimeter in terms of π .

Perimeter of a Circle (D)

A circle has radius 8 m. Find the perimeter in terms of π .

A circle has radius 9 cm. Find the perimeter in terms of π .

A circle has radius 18 mm. Find the perimeter in terms of π .

A circle has radius 1 cm. Find the perimeter in terms of π .

A circle has radius 20 mm. Find the perimeter in terms of π .

A circle has radius 5 m. Find the perimeter in terms of π .

Perimeter of a Circle (E)

A circle has radius 20 mm. Find the perimeter in terms of π .

A circle has radius 12 cm. Find the perimeter in terms of π .

A circle has radius 15 mm. Find the perimeter in terms of π .

A circle has radius 1 cm. Find the perimeter in terms of π .

A circle has radius 18 m. Find the perimeter in terms of π .

A circle has radius 2 m. Find the perimeter in terms of π .

Perimeter of a Circle (F)

A circle has radius 9 cm. Find the perimeter in terms of π .

A circle has radius 12 m. Find the perimeter in terms of π .

A circle has radius 14 cm. Find the perimeter in terms of π .

A circle has radius 1 mm. Find the perimeter in terms of π .

A circle has radius 6 m. Find the perimeter in terms of π .

A circle has radius 4 mm. Find the perimeter in terms of π .

Perimeter of a Circle (G)

A circle has radius 1 m. Find the perimeter in terms of π .

A circle has radius 12 cm. Find the perimeter in terms of π .

A circle has radius 20 cm. Find the perimeter in terms of π .

A circle has radius 17 m. Find the perimeter in terms of π .

A circle has radius 7 mm. Find the perimeter in terms of π .

A circle has radius 5 mm. Find the perimeter in terms of π .

Perimeter of a Circle (H)

A circle has radius 12 mm. Find the perimeter in terms of π .

A circle has radius 5 cm. Find the perimeter in terms of π .

A circle has radius 11 m. Find the perimeter in terms of π .

A circle has radius 14 m. Find the perimeter in terms of π .

A circle has radius 20 mm. Find the perimeter in terms of π .

A circle has radius 18 cm. Find the perimeter in terms of π .

Perimeter of a Circle (I)

A circle has radius 19 mm. Find the perimeter in terms of π .

A circle has radius 5 cm. Find the perimeter in terms of π .

A circle has radius 18 mm. Find the perimeter in terms of π .

A circle has radius 6 cm. Find the perimeter in terms of π .

A circle has radius 11 m. Find the perimeter in terms of π .

A circle has radius 1 m. Find the perimeter in terms of π .

Perimeter of a Circle (J)

A circle has radius 2 mm. Find the perimeter in terms of π .

A circle has radius 13 cm. Find the perimeter in terms of π .

A circle has radius 8 mm. Find the perimeter in terms of π .

A circle has radius 20 cm. Find the perimeter in terms of π .

A circle has radius 9 m. Find the perimeter in terms of π .

A circle has radius 11 m. Find the perimeter in terms of π .
