Area of a Triangle (A)

A triangle has base 13 m and height 4 m. Find the area.

A triangle has base 4 cm and height 20 cm. Find the area.

A triangle has base 9 mm and height 1 mm. Find the area.

A triangle has base 3 mm and height 9 mm. Find the area.

A triangle has base 18 cm and height 11 cm. Find the area.

A triangle has base 11 m and height 10 m. Find the area.

Area of a Triangle (B)

A triangle has base 6 m and height 4 m. Find the area.

A triangle has base 6 mm and height 19 mm. Find the area.

A triangle has base 7 m and height 16 m. Find the area.

A triangle has base 13 mm and height 12 mm. Find the area.

A triangle has base 11 cm and height 18 cm. Find the area.

A triangle has base 6 cm and height 9 cm. Find the area.

Area of a Triangle (C)

A triangle has base 13 m and height 17 m. Find the area.

A triangle has base 19 mm and height 19 mm. Find the area.

A triangle has base 17 mm and height 5 mm. Find the area.

A triangle has base 17 cm and height 19 cm. Find the area.

A triangle has base 1 cm and height 10 cm. Find the area.

A triangle has base 20 m and height 20 m. Find the area.

Area of a Triangle (D)

A triangle has base 16 mm and height 12 mm. Find the area.

A triangle has base 1 cm and height 1 cm. Find the area.

A triangle has base 20 cm and height 3 cm. Find the area.

A triangle has base 12 mm and height 2 mm. Find the area.

A triangle has base 12 m and height 7 m. Find the area.

A triangle has base 4 m and height 4 m. Find the area.

Area of a Triangle (E)

A triangle has base 13 m and height 1 m. Find the area.

A triangle has base 12 cm and height 17 cm. Find the area.

A triangle has base 15 m and height 14 m. Find the area.

A triangle has base 1 mm and height 14 mm. Find the area.

A triangle has base 18 mm and height 6 mm. Find the area.

A triangle has base 1 cm and height 17 cm. Find the area.

Area of a Triangle (F)

A triangle has base 19 cm and height 7 cm. Find the area.

A triangle has base 17 mm and height 4 mm. Find the area.

A triangle has base 5 m and height 16 m. Find the area.

A triangle has base 9 cm and height 2 cm. Find the area.

A triangle has base 17 m and height 1 m. Find the area.

A triangle has base 3 mm and height 20 mm. Find the area.

Area of a Triangle (G)

A triangle has base 8 mm and height 14 mm. Find the area.

A triangle has base 7 mm and height 20 mm. Find the area.

A triangle has base 16 m and height 18 m. Find the area.

A triangle has base 13 cm and height 11 cm. Find the area.

A triangle has base 17 m and height 7 m. Find the area.

A triangle has base 7 cm and height 17 cm. Find the area.

Area of a Triangle (H)

A triangle has base 15 cm and height 15 cm. Find the area.

A triangle has base 14 m and height 2 m. Find the area.

A triangle has base 4 mm and height 5 mm. Find the area.

A triangle has base 6 mm and height 13 mm. Find the area.

A triangle has base 9 m and height 7 m. Find the area.

A triangle has base 2 cm and height 13 cm. Find the area.

Area of a Triangle (I)

A triangle has base 8 cm and height 14 cm. Find the area.

A triangle has base 6 m and height 12 m. Find the area.

A triangle has base 14 cm and height 17 cm. Find the area.

A triangle has base 20 mm and height 20 mm. Find the area.

A triangle has base 1 m and height 10 m. Find the area.

A triangle has base 14 mm and height 14 mm. Find the area.

Area of a Triangle (J)

A triangle has base 13 cm and height 11 cm. Find the area.

A triangle has base 17 mm and height 4 mm. Find the area.

A triangle has base 1 cm and height 13 cm. Find the area.

A triangle has base 12 m and height 9 m. Find the area.

A triangle has base 18 mm and height 17 mm. Find the area.

A triangle has base 17 m and height 1 m. Find the area.
