

Solutions – Interior Angles of a Polygon (A)

A regular polygon has 4 sides. Find the size of each interior angle.

90°

A regular polygon has 9 sides. Find the size of each interior angle.

140°

A regular polygon has 8 sides. Find the size of each interior angle.

135°

A regular polygon has 6 sides. Find the size of each interior angle.

120°

A regular polygon has 10 sides. Find the size of each interior angle.

144°

A regular polygon has 5 sides. Find the size of each interior angle.

108°

Solutions – Interior Angles of a Polygon (B)

A regular polygon has 4 sides. Find the size of each interior angle.

90°

A regular polygon has 5 sides. Find the size of each interior angle.

108°

A regular polygon has 3 sides. Find the size of each interior angle.

60°

A regular polygon has 8 sides. Find the size of each interior angle.

135°

A regular polygon has 9 sides. Find the size of each interior angle.

140°

A regular polygon has 6 sides. Find the size of each interior angle.

120°

Solutions – Interior Angles of a Polygon (C)

A regular polygon has 10 sides. Find the size of each interior angle.

144°

A regular polygon has 8 sides. Find the size of each interior angle.

135°

A regular polygon has 3 sides. Find the size of each interior angle.

60°

A regular polygon has 5 sides. Find the size of each interior angle.

108°

A regular polygon has 6 sides. Find the size of each interior angle.

120°

A regular polygon has 4 sides. Find the size of each interior angle.

90°

Solutions – Interior Angles of a Polygon (D)

A regular polygon has 5 sides. Find the size of each interior angle.

108°

A regular polygon has 3 sides. Find the size of each interior angle.

60°

A regular polygon has 8 sides. Find the size of each interior angle.

135°

A regular polygon has 4 sides. Find the size of each interior angle.

90°

A regular polygon has 6 sides. Find the size of each interior angle.

120°

A regular polygon has 9 sides. Find the size of each interior angle.

140°

Solutions – Interior Angles of a Polygon (E)

A regular polygon has 5 sides. Find the size of each interior angle.

108°

A regular polygon has 4 sides. Find the size of each interior angle.

90°

A regular polygon has 9 sides. Find the size of each interior angle.

140°

A regular polygon has 6 sides. Find the size of each interior angle.

120°

A regular polygon has 10 sides. Find the size of each interior angle.

144°

A regular polygon has 8 sides. Find the size of each interior angle.

135°

Solutions – Interior Angles of a Polygon (F)

A regular polygon has 5 sides. Find the size of each interior angle.

108°

A regular polygon has 6 sides. Find the size of each interior angle.

120°

A regular polygon has 10 sides. Find the size of each interior angle.

144°

A regular polygon has 3 sides. Find the size of each interior angle.

60°

A regular polygon has 8 sides. Find the size of each interior angle.

135°

A regular polygon has 4 sides. Find the size of each interior angle.

90°

Solutions – Interior Angles of a Polygon (G)

A regular polygon has 5 sides. Find the size of each interior angle.

108°

A regular polygon has 4 sides. Find the size of each interior angle.

90°

A regular polygon has 9 sides. Find the size of each interior angle.

140°

A regular polygon has 6 sides. Find the size of each interior angle.

120°

A regular polygon has 3 sides. Find the size of each interior angle.

60°

A regular polygon has 8 sides. Find the size of each interior angle.

135°

Solutions – Interior Angles of a Polygon (H)

A regular polygon has 3 sides. Find the size of each interior angle.

60°

A regular polygon has 8 sides. Find the size of each interior angle.

135°

A regular polygon has 4 sides. Find the size of each interior angle.

90°

A regular polygon has 5 sides. Find the size of each interior angle.

108°

A regular polygon has 9 sides. Find the size of each interior angle.

140°

A regular polygon has 10 sides. Find the size of each interior angle.

144°

Solutions – Interior Angles of a Polygon (I)

A regular polygon has 5 sides. Find the size of each interior angle.

108°

A regular polygon has 4 sides. Find the size of each interior angle.

90°

A regular polygon has 10 sides. Find the size of each interior angle.

144°

A regular polygon has 9 sides. Find the size of each interior angle.

140°

A regular polygon has 8 sides. Find the size of each interior angle.

135°

A regular polygon has 6 sides. Find the size of each interior angle.

120°

Solutions – Interior Angles of a Polygon (J)

A regular polygon has 10 sides. Find the size of each interior angle.

144°

A regular polygon has 9 sides. Find the size of each interior angle.

140°

A regular polygon has 3 sides. Find the size of each interior angle.

60°

A regular polygon has 4 sides. Find the size of each interior angle.

90°

A regular polygon has 6 sides. Find the size of each interior angle.

120°

A regular polygon has 5 sides. Find the size of each interior angle.

108°
