

Finding Axis Intercepts (A)

Find the axis intercepts of the line $y = x + 5$.

Find the axis intercepts of the line $y = -4x + 2$.

Find the axis intercepts of the line $y = -x$.

Find the axis intercepts of the line $y = 4x - 1$.

Find the axis intercepts of the line $y = -2x - 3$.

Find the axis intercepts of the line $y = -4x - 7$.

Finding Axis Intercepts (B)

Find the axis intercepts of the line $y = 3x + 6$.

Find the axis intercepts of the line $y = x + 2$.

Find the axis intercepts of the line $y = -2x + 10$.

Find the axis intercepts of the line $y = -5x + 10$.

Find the axis intercepts of the line $y = x + 3$.

Find the axis intercepts of the line $y = -x - 2$.

Finding Axis Intercepts (C)

Find the axis intercepts of the line $y = -3x$.

Find the axis intercepts of the line $y = -3x - 2$.

Find the axis intercepts of the line $y = 2x - 3$.

Find the axis intercepts of the line $y = 2x + 6$.

Find the axis intercepts of the line $y = 2x - 1$.

Find the axis intercepts of the line $y = -x - 1$.

Finding Axis Intercepts (D)

Find the axis intercepts of the line $y = 5x$.

Find the axis intercepts of the line $y = 5x - 8$.

Find the axis intercepts of the line $y = 2x - 1$.

Find the axis intercepts of the line $y = 3x - 5$.

Find the axis intercepts of the line $y = -2x - 7$.

Find the axis intercepts of the line $y = -4x + 1$.

Finding Axis Intercepts (E)

Find the axis intercepts of the line $y = 3x + 8$.

Find the axis intercepts of the line $y = -2x - 5$.

Find the axis intercepts of the line $y = -4x - 5$.

Find the axis intercepts of the line $y = -x + 1$.

Find the axis intercepts of the line $y = 5x - 7$.

Find the axis intercepts of the line $y = -2x + 2$.

Finding Axis Intercepts (F)

Find the axis intercepts of the line $y = -5x - 10$.

Find the axis intercepts of the line $y = 3x - 8$.

Find the axis intercepts of the line $y = 2x + 2$.

Find the axis intercepts of the line $y = x - 7$.

Find the axis intercepts of the line $y = -3x - 1$.

Find the axis intercepts of the line $y = 3x + 1$.

Finding Axis Intercepts (G)

Find the axis intercepts of the line $y = -3x - 2$.

Find the axis intercepts of the line $y = x - 6$.

Find the axis intercepts of the line $y = 2x + 6$.

Find the axis intercepts of the line $y = 4x + 8$.

Find the axis intercepts of the line $y = 4x + 5$.

Find the axis intercepts of the line $y = x - 3$.

Finding Axis Intercepts (H)

Find the axis intercepts of the line $y = 5x + 9$.

Find the axis intercepts of the line $y = -x - 2$.

Find the axis intercepts of the line $y = 2x + 9$.

Find the axis intercepts of the line $y = -4x - 4$.

Find the axis intercepts of the line $y = -5x - 9$.

Find the axis intercepts of the line $y = -x - 6$.

Finding Axis Intercepts (I)

Find the axis intercepts of the line $y = 3x - 9$.

Find the axis intercepts of the line $y = x + 4$.

Find the axis intercepts of the line $y = 5x - 9$.

Find the axis intercepts of the line $y = x + 5$.

Find the axis intercepts of the line $y = -2x - 1$.

Find the axis intercepts of the line $y = 4x - 6$.

Finding Axis Intercepts (J)

Find the axis intercepts of the line $y = 2x$.

Find the axis intercepts of the line $y = -x + 6$.

Find the axis intercepts of the line $y = 4x - 2$.

Find the axis intercepts of the line $y = -5x - 5$.

Find the axis intercepts of the line $y = -2x + 2$.

Find the axis intercepts of the line $y = -5x + 10$.
