

Binomial Theorem (A)

Find the coefficient of x^2 in $(2x - 6)^5$.

Expand $(3x - 6)^4$.

Expand $(x + 1)^3$.

Binomial Theorem (B)

Expand $(x + 1)^3$.

Find the coefficient of x^3 in $(2x - 2)^5$.

Expand $(2x - 5)^4$.

Binomial Theorem (C)

Expand $(x + 4)^3$.

Find the coefficient of x^3 in $(-2x - 5)^5$.

Expand $(3x - 2)^4$.

Binomial Theorem (D)

Find the coefficient of x^3 in $(-2x - 3)^5$.

Expand $(3x - 1)^4$.

Expand $(x + 6)^3$.

Binomial Theorem (E)

Expand $(3x - 6)^4$.

Expand $(x + 1)^3$.

Find the coefficient of x^3 in $(-3x + 6)^5$.

Binomial Theorem (F)

Expand $(x + 5)^3$.

Expand $(2x - 5)^4$.

Find the coefficient of x in $(2x + 5)^5$.

Binomial Theorem (G)

Find the coefficient of x^4 in $(3x - 6)^5$.

Expand $(x + 3)^3$.

Expand $(3x - 2)^4$.

Binomial Theorem (H)

Find the coefficient of x^4 in $(-2x + 1)^5$.

Expand $(2x - 2)^4$.

Expand $(x + 2)^3$.

Binomial Theorem (I)

Expand $(x + 3)^3$.

Expand $(2x - 3)^4$.

Find the coefficient of x in $(-3x - 3)^5$.

Binomial Theorem (J)

Expand $(x + 2)^3$.

Find the coefficient of x^2 in $(-2x + 1)^5$.

Expand $(2x - 3)^4$.
