

## Solutions – Identifying Parent Functions (A)

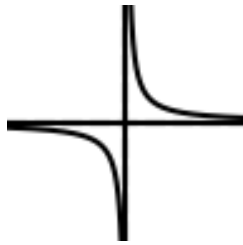

Write down the name of the function.

Quadratic

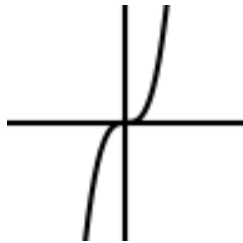

Write down the name of the function.

Linear

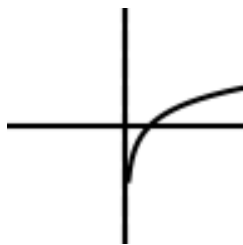

Write down the name of the function.

Reciprocal

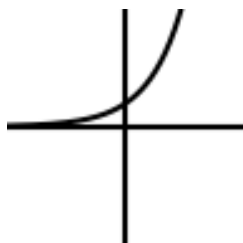

Write down the name of the function.

Cubic

Write down the name of the function.

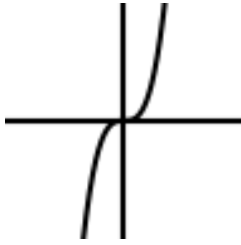

Logarithmic

Write down the name of the function.

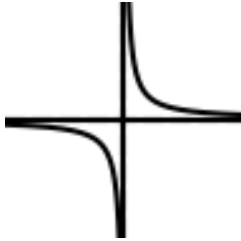

Exponential

## Solutions – Identifying Parent Functions (B)

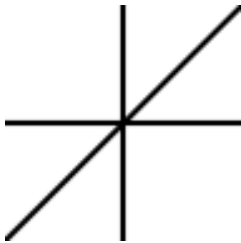

Write down the name of the function.

Cubic

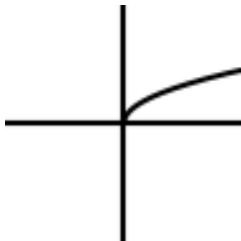

Write down the name of the function.

Reciprocal

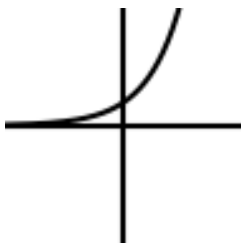

Write down the name of the function.

Linear

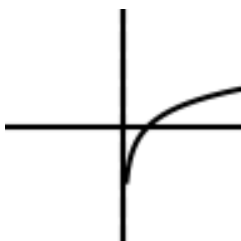

Write down the name of the function.

Square root

Write down the name of the function.

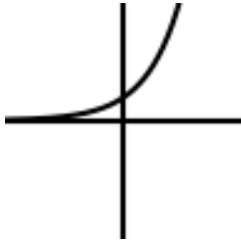

Exponential

Write down the name of the function.

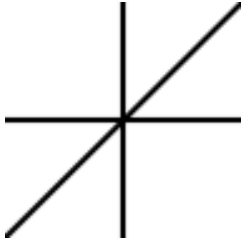

Logarithmic

## Solutions – Identifying Parent Functions (C)

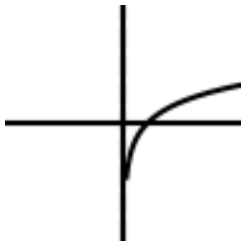

Write down the name of the function.

Exponential

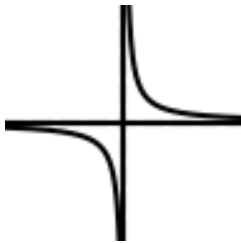

Write down the name of the function.

Linear

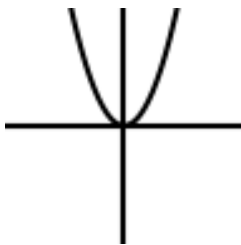

Write down the name of the function.

Logarithmic

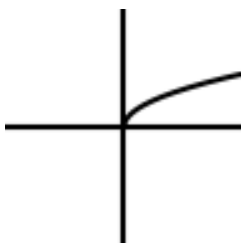

Write down the name of the function.

Reciprocal

Write down the name of the function.

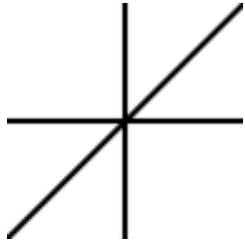

Quadratic

Write down the name of the function.

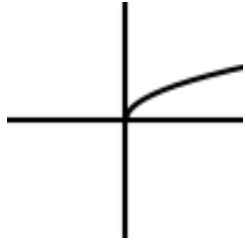

Square root

## Solutions – Identifying Parent Functions (D)

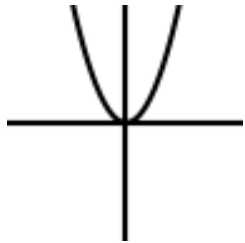

Write down the name of the function.

Linear

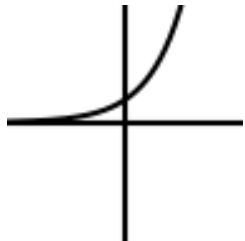

Write down the name of the function.

Square root

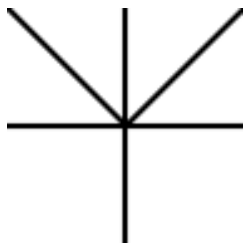

Write down the name of the function.

Quadratic

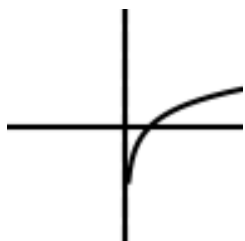

Write down the name of the function.

Exponential

Write down the name of the function.

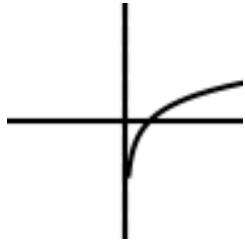

Absolute value

Write down the name of the function.

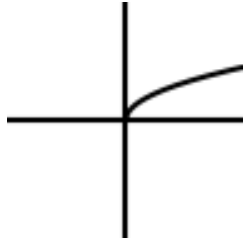

Logarithmic

## Solutions – Identifying Parent Functions (E)

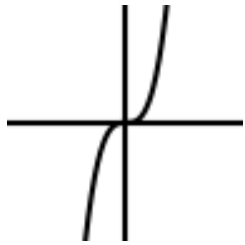

Write down the name of the function.

Logarithmic

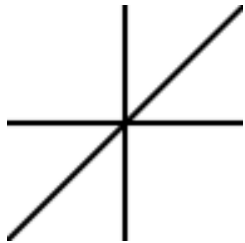

Write down the name of the function.

Square root

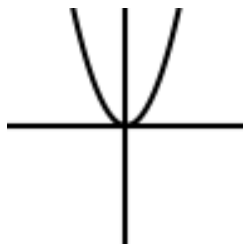

Write down the name of the function.

Cubic

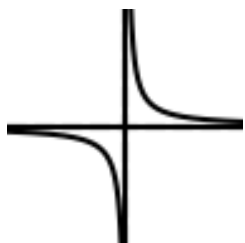

Write down the name of the function.

Linear

Write down the name of the function.

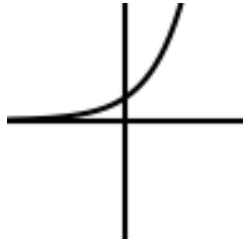

Quadratic

Write down the name of the function.

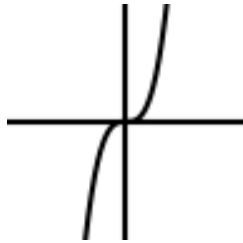

Reciprocal

## Solutions – Identifying Parent Functions (F)

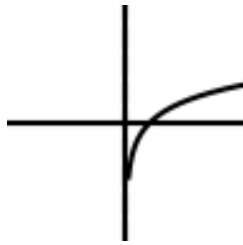

Write down the name of the function.

Exponential

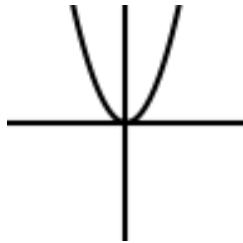

Write down the name of the function.

Cubic

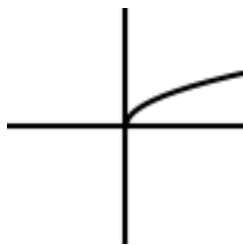

Write down the name of the function.

Logarithmic

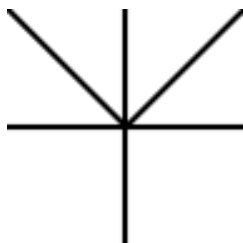

Write down the name of the function.

Quadratic

Write down the name of the function.

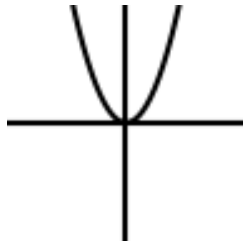

Square root

Write down the name of the function.

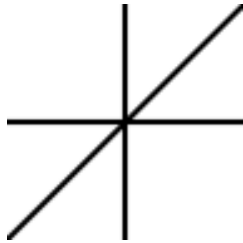

Absolute value

## Solutions – Identifying Parent Functions (G)

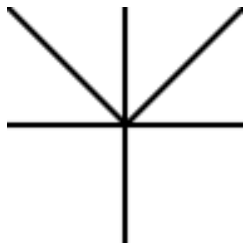

Write down the name of the function.

Quadratic

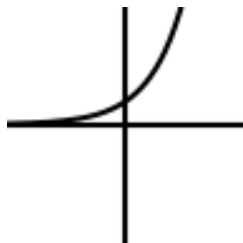

Write down the name of the function.

Linear

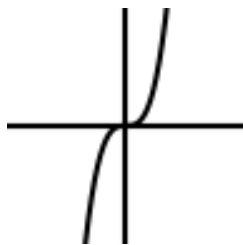

Write down the name of the function.

Absolute value

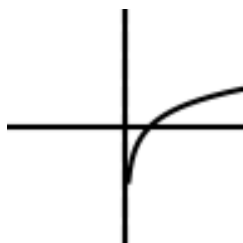

Write down the name of the function.

Exponential

Write down the name of the function.

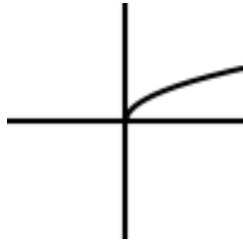

Cubic

Write down the name of the function.

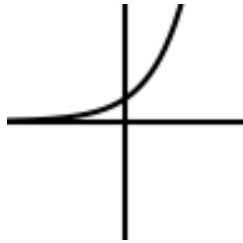

Logarithmic

## Solutions – Identifying Parent Functions (H)

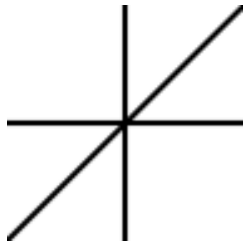

Write down the name of the function.

Square root

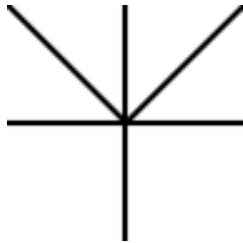

Write down the name of the function.

Exponential

Write down the name of the function.

Linear

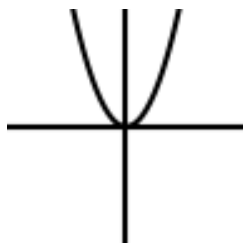

Write down the name of the function.

Absolute value

Write down the name of the function.

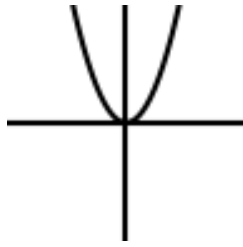

Reciprocal

Write down the name of the function.

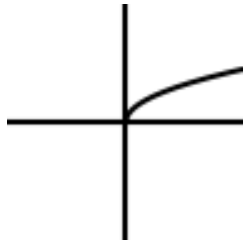

Quadratic

## Solutions – Identifying Parent Functions (I)

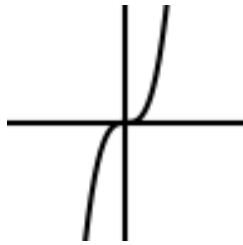

Write down the name of the function.

Quadratic

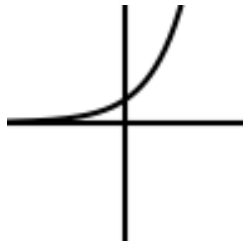

Write down the name of the function.

Square root

Write down the name of the function.

Cubic

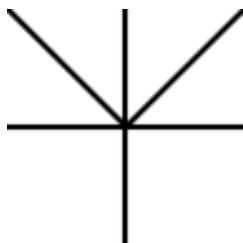

Write down the name of the function.

Exponential

Write down the name of the function.

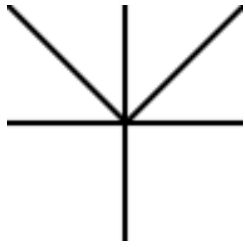

Reciprocal

Write down the name of the function.

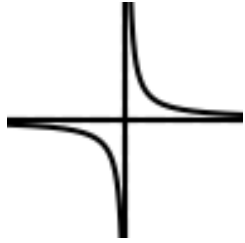

Absolute value

## Solutions – Identifying Parent Functions (J)

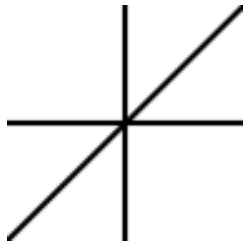

Write down the name of the function.

Absolute value

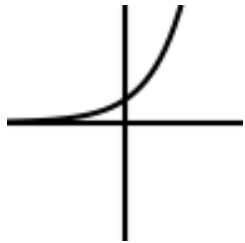

Write down the name of the function.

Reciprocal

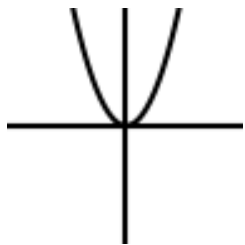

Write down the name of the function.

Linear

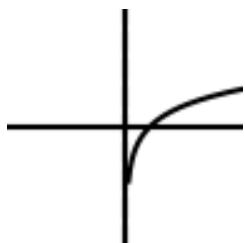

Write down the name of the function.

Exponential

Write down the name of the function.

Quadratic

Write down the name of the function.

Logarithmic
