

Solutions – Slope Between Two Points (A)

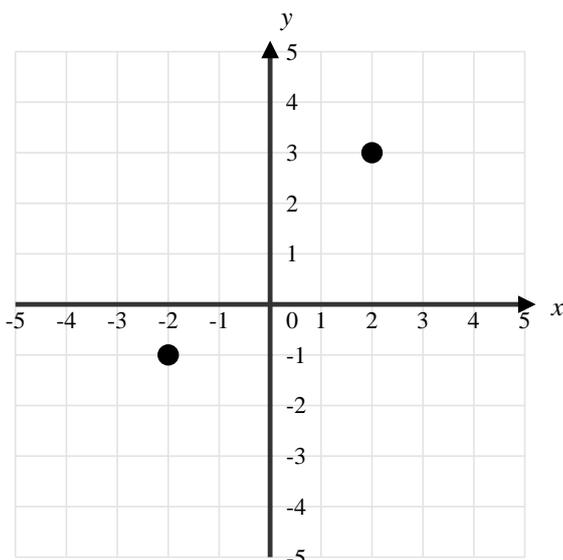

The points (3, 4) and (4, 3) are shown on the grid. Find the slope between the points.

-1

The points (-3, -2) and (-2, 1) are shown on the grid. Find the slope between the points.

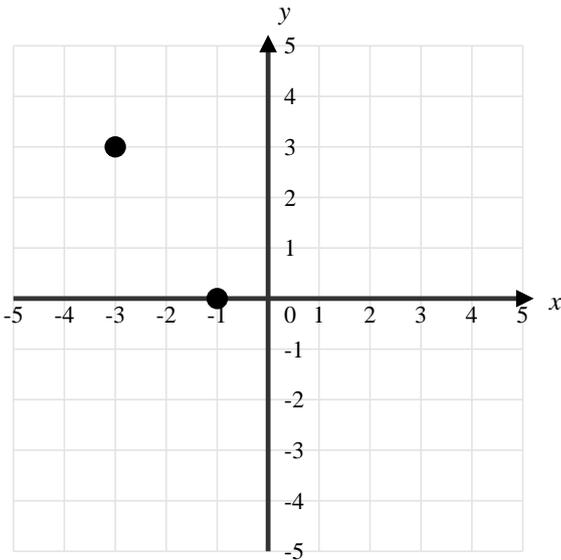

3

The points (-2, -1) and (2, 3) are shown on the grid. Find the slope between the points.

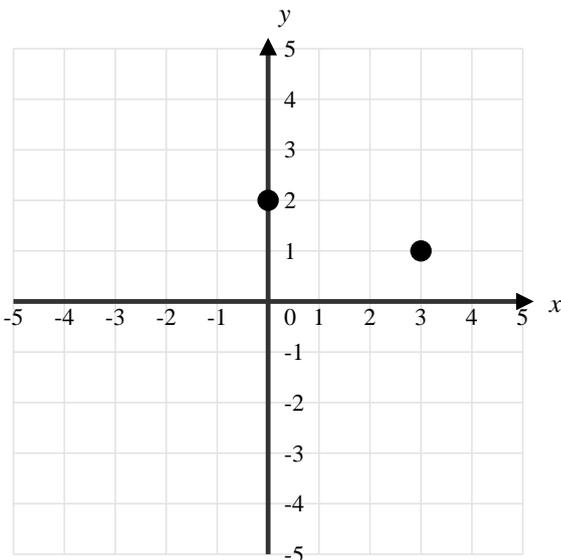

1

Solutions – Slope Between Two Points (B)

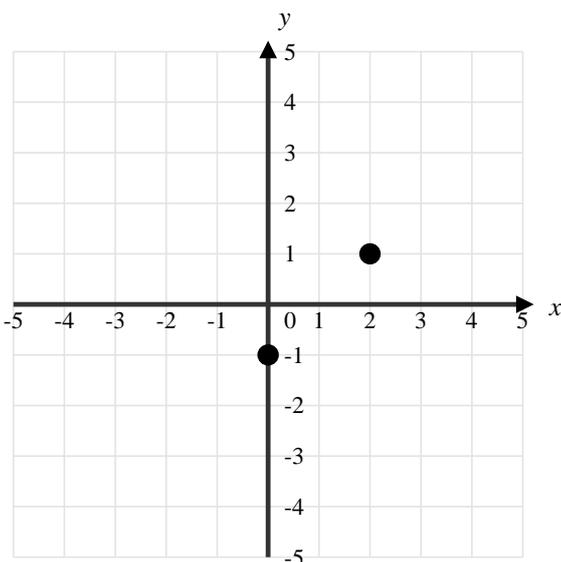

The points $(-3, 3)$ and $(-1, 0)$ are shown on the grid. Find the slope between the points.

$$-3/2$$

The points $(0, 2)$ and $(3, 1)$ are shown on the grid. Find the slope between the points.

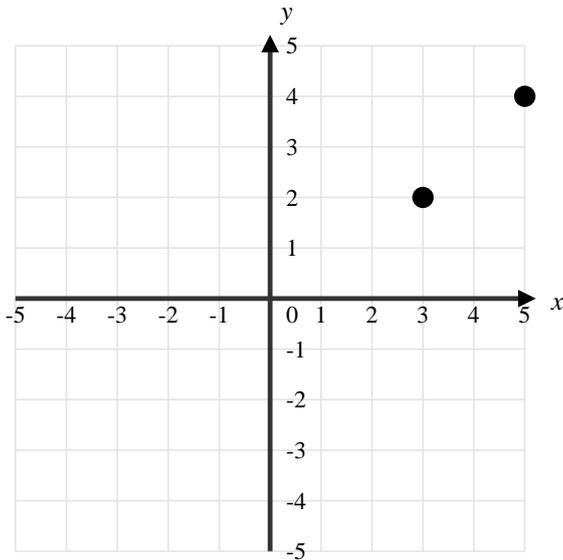

$$-1/3$$

The points $(0, -1)$ and $(2, 1)$ are shown on the grid. Find the slope between the points.

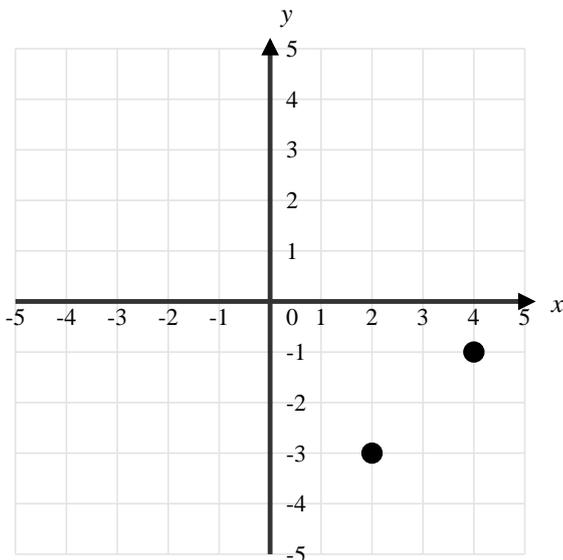

$$1$$

Solutions – Slope Between Two Points (C)

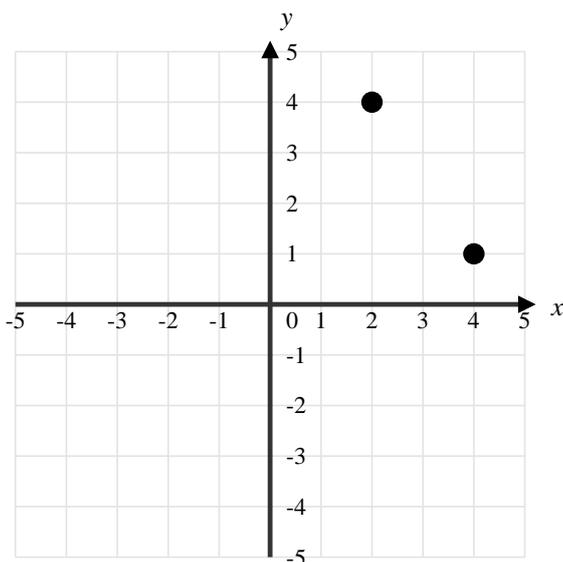

The points (3, 2) and (5, 4) are shown on the grid. Find the slope between the points.

1

The points (2, -3) and (4, -1) are shown on the grid. Find the slope between the points.

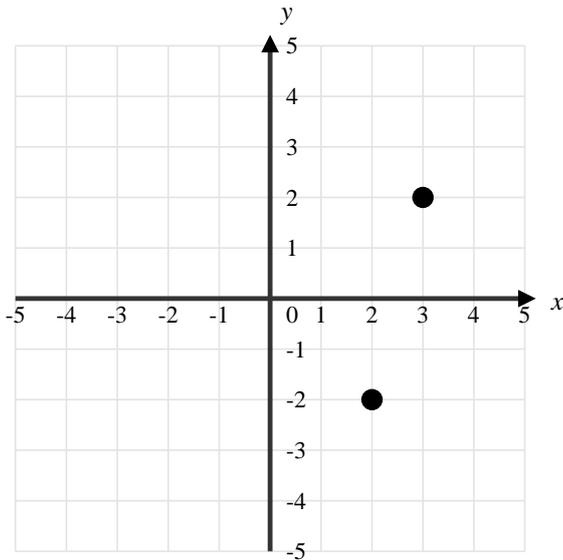

1

The points (2, 4) and (4, 1) are shown on the grid. Find the slope between the points.

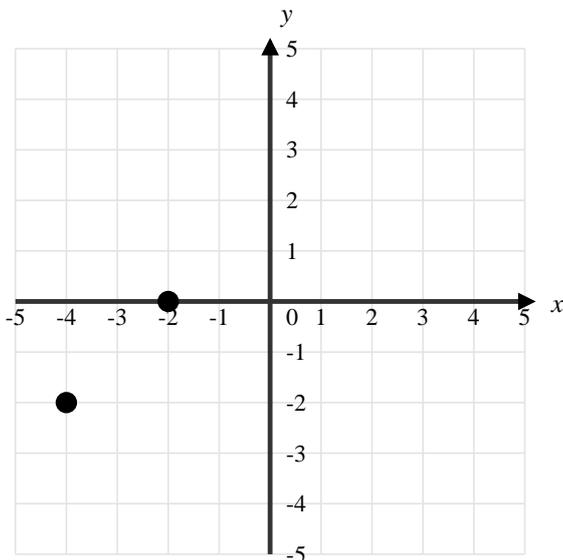

$-3/2$

Solutions – Slope Between Two Points (D)

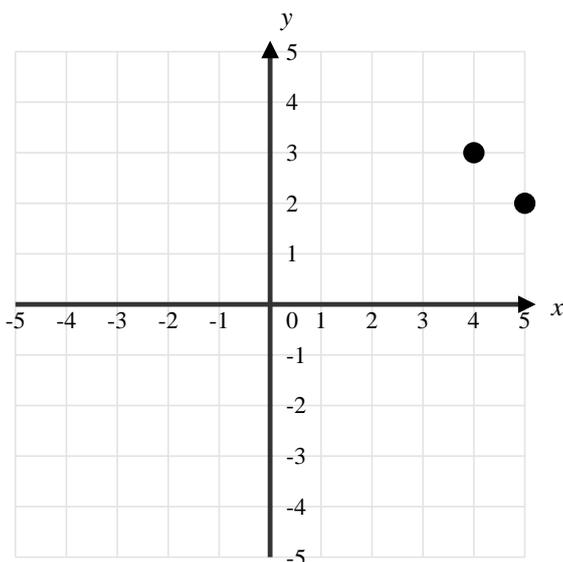

The points $(2, -2)$ and $(3, 2)$ are shown on the grid. Find the slope between the points.

4

The points $(-4, -2)$ and $(-2, 0)$ are shown on the grid. Find the slope between the points.

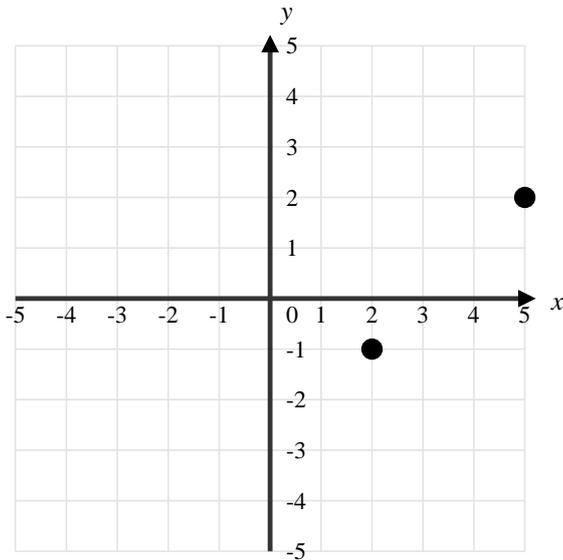

1

The points $(4, 3)$ and $(5, 2)$ are shown on the grid. Find the slope between the points.

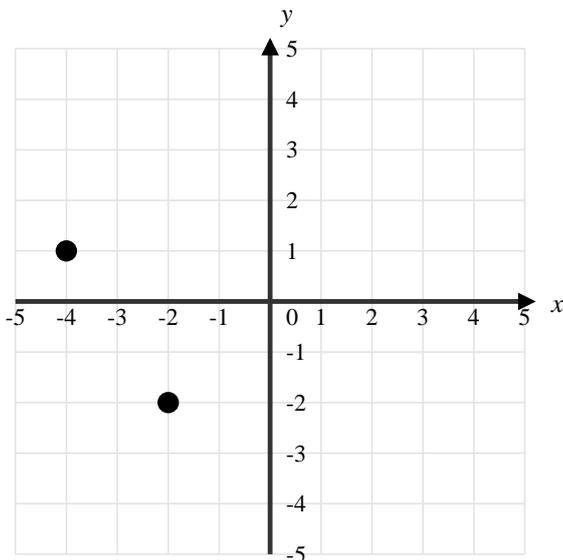

-1

Solutions – Slope Between Two Points (E)

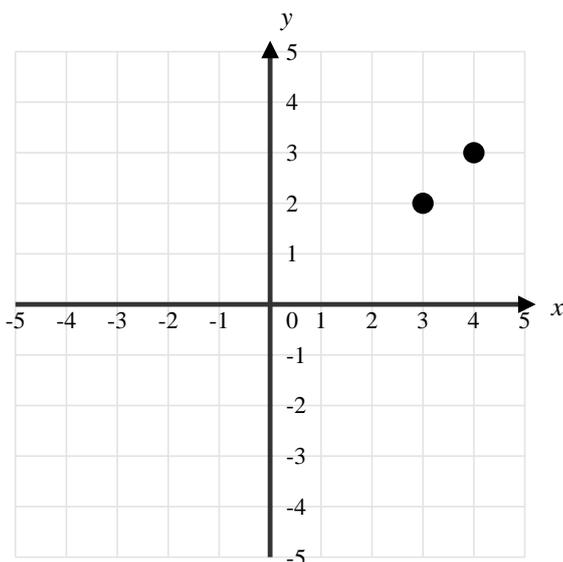

The points $(2, -1)$ and $(5, 2)$ are shown on the grid. Find the slope between the points.

1

The points $(-4, 1)$ and $(-2, -2)$ are shown on the grid. Find the slope between the points.

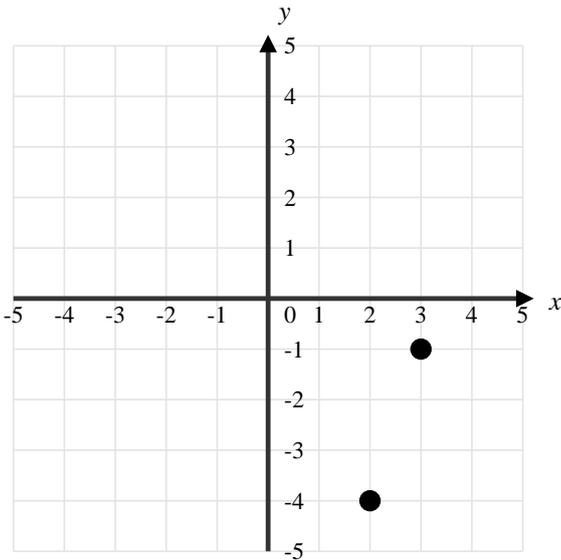

$-3/2$

The points $(3, 2)$ and $(4, 3)$ are shown on the grid. Find the slope between the points.

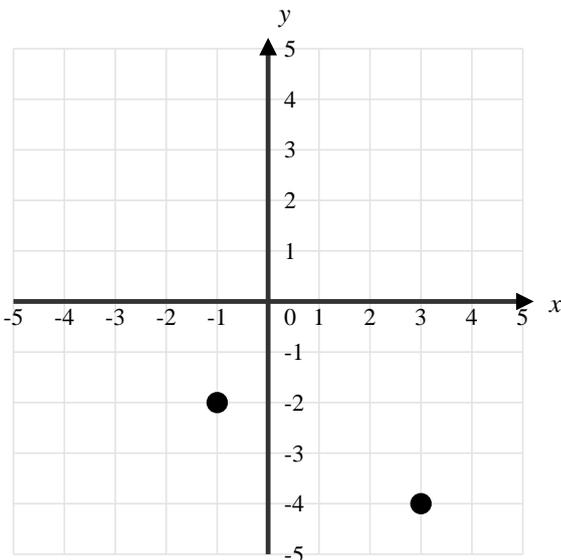

1

Solutions – Slope Between Two Points (F)

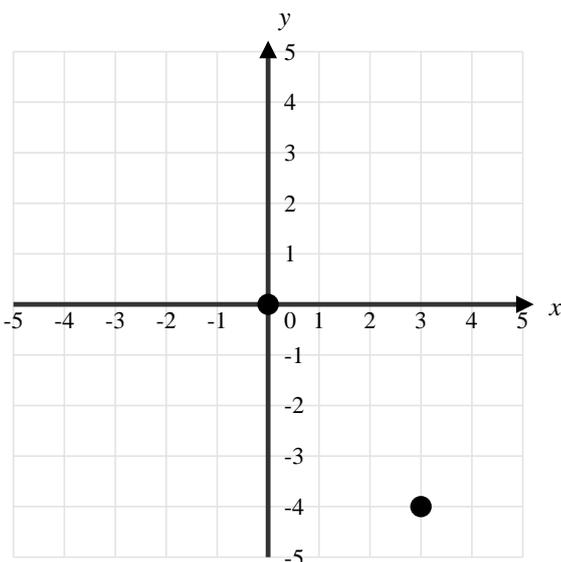

The points $(2, -4)$ and $(3, -1)$ are shown on the grid. Find the slope between the points.

3

The points $(-1, -2)$ and $(3, -4)$ are shown on the grid. Find the slope between the points.

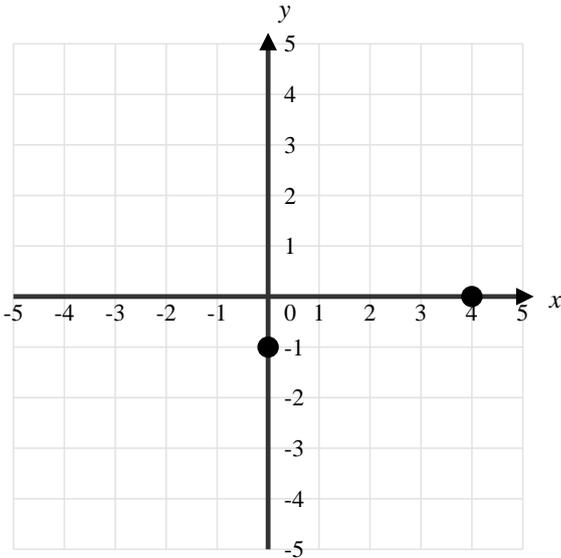

$-1/2$

The points $(0, 0)$ and $(3, -4)$ are shown on the grid. Find the slope between the points.

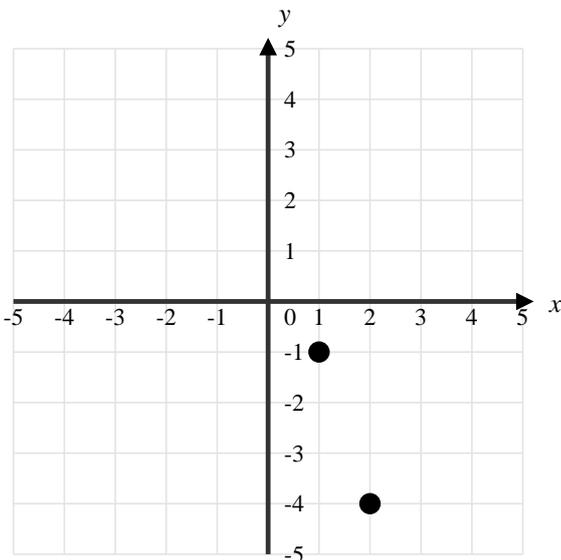

$-4/3$

Solutions – Slope Between Two Points (G)

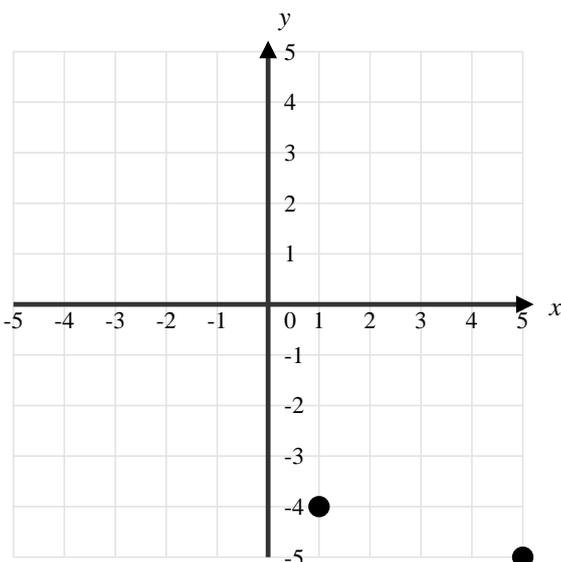

The points $(0, -1)$ and $(4, 0)$ are shown on the grid. Find the slope between the points.

$$\frac{1}{4}$$

The points $(1, -1)$ and $(2, -4)$ are shown on the grid. Find the slope between the points.

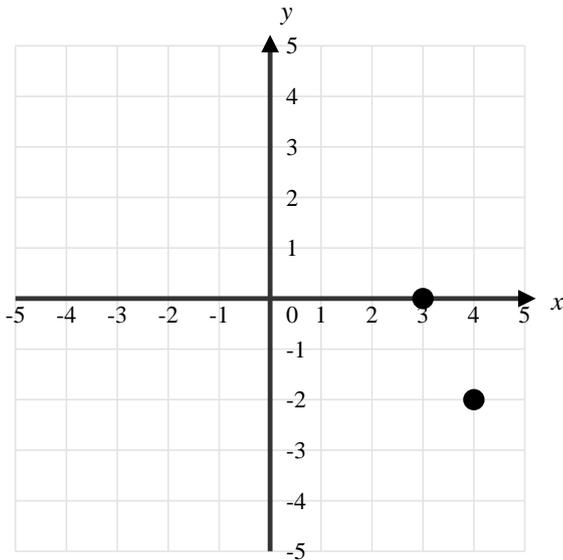

$$-3$$

The points $(1, -4)$ and $(5, -5)$ are shown on the grid. Find the slope between the points.

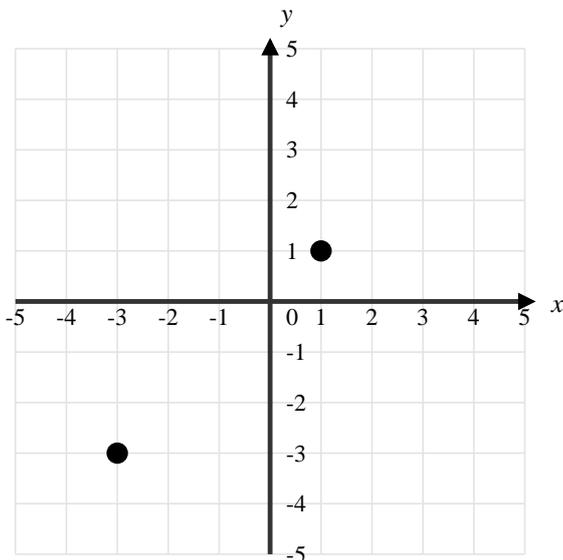

$$-\frac{1}{4}$$

Solutions – Slope Between Two Points (H)

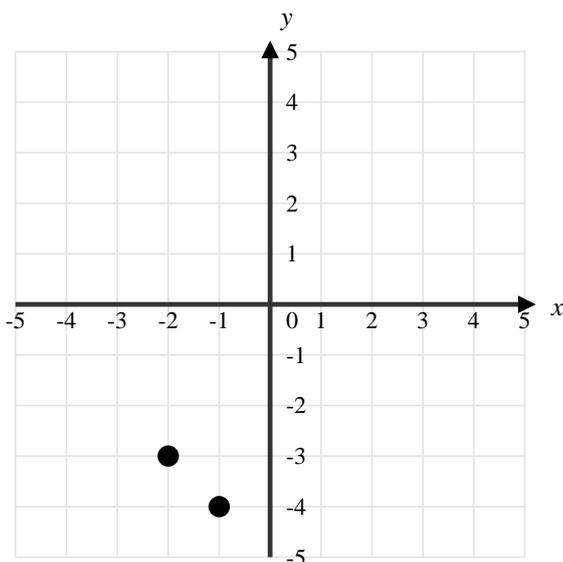

The points $(3, 0)$ and $(4, -2)$ are shown on the grid. Find the slope between the points.

-2

The points $(-3, -3)$ and $(1, 1)$ are shown on the grid. Find the slope between the points.

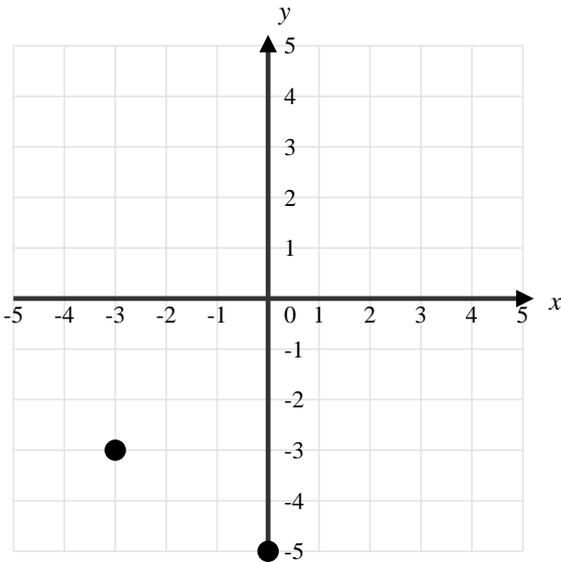

1

The points $(-2, -3)$ and $(-1, -4)$ are shown on the grid. Find the slope between the points.

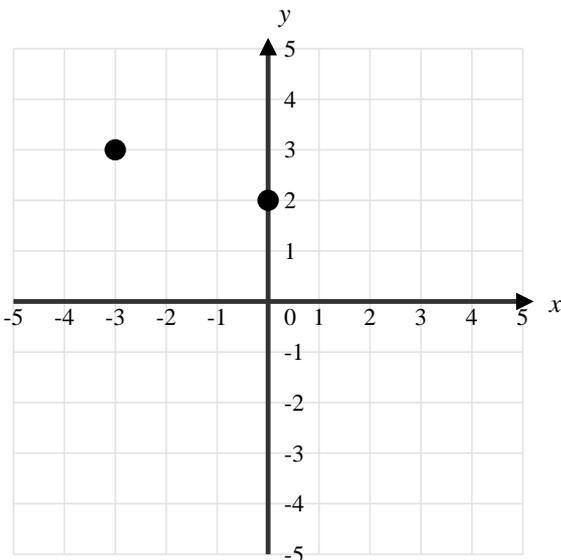

-1

Solutions – Slope Between Two Points (I)

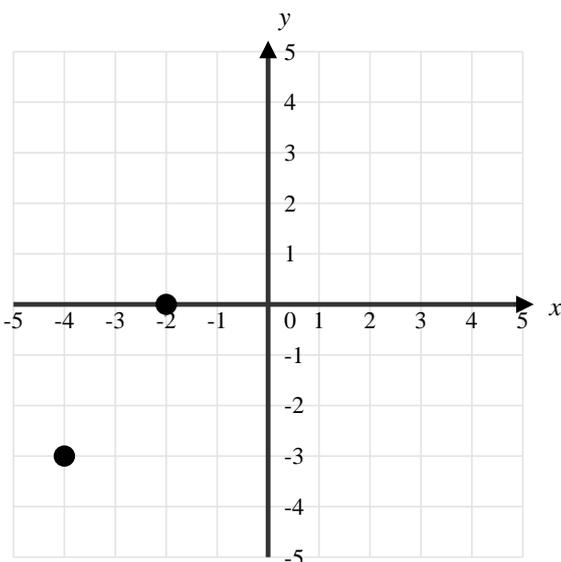

The points $(-3, -3)$ and $(0, -5)$ are shown on the grid. Find the slope between the points.

$$-2/3$$

The points $(-3, 3)$ and $(0, 2)$ are shown on the grid. Find the slope between the points.

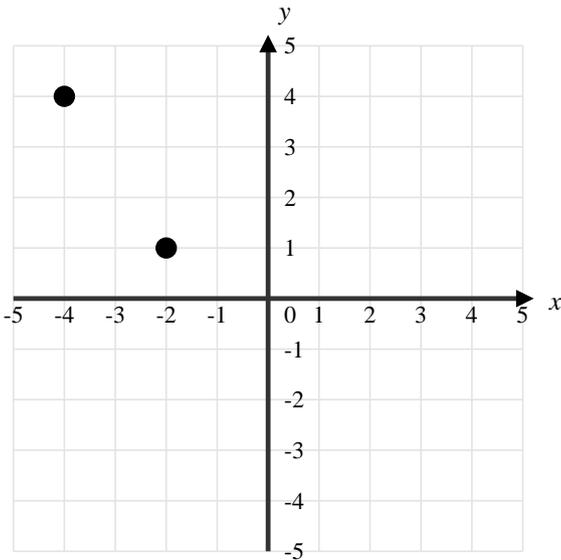

$$-1/3$$

The points $(-4, -3)$ and $(-2, 0)$ are shown on the grid. Find the slope between the points.

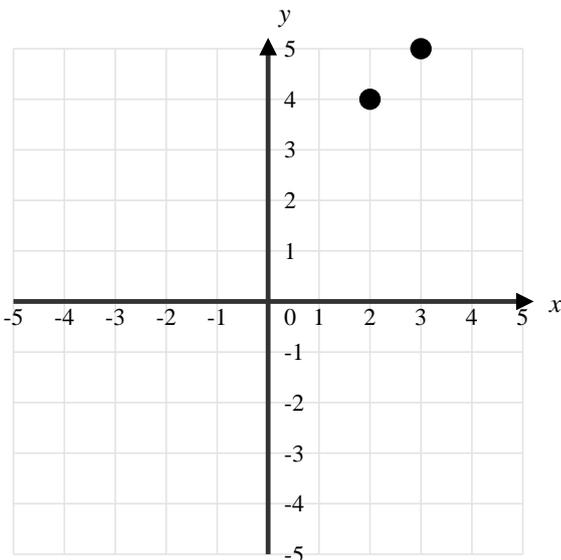

$$3/2$$

Solutions – Slope Between Two Points (J)

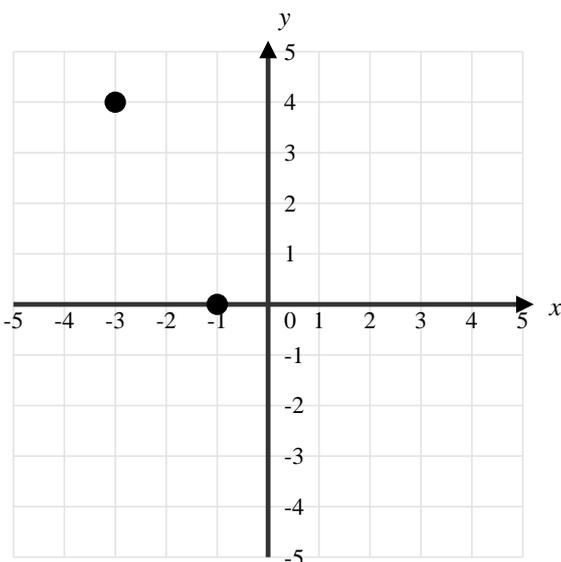

The points $(-4, 4)$ and $(-2, 1)$ are shown on the grid. Find the slope between the points.

$$-3/2$$

The points $(2, 4)$ and $(3, 5)$ are shown on the grid. Find the slope between the points.

$$1$$

The points $(-3, 4)$ and $(-1, 0)$ are shown on the grid. Find the slope between the points.

$$-2$$
