

Solutions – Categorising Angles (A)

An angle measures 360° . What type of angle is it?

full angle

An angle measures 19° . What type of angle is it?

acute angle

An angle measures 356° . What type of angle is it?

reflex angle

An angle measures 129° . What type of angle is it?

obtuse angle

An angle measures 67° . What type of angle is it?

acute angle

An angle measures 90° . What type of angle is it?

right angle

An angle measures 180° . What type of angle is it?

straight angle

Solutions – Categorising Angles (B)

An angle measures 90° . What type of angle is it?

right angle

An angle measures 44° . What type of angle is it?

acute angle

An angle measures 306° . What type of angle is it?

reflex angle

An angle measures 169° . What type of angle is it?

obtuse angle

An angle measures 58° . What type of angle is it?

acute angle

An angle measures 180° . What type of angle is it?

straight angle

An angle measures 360° . What type of angle is it?

full angle

Solutions – Categorising Angles (C)

An angle measures 180° . What type of angle is it?

straight angle

An angle measures 266° . What type of angle is it?

reflex angle

An angle measures 90° . What type of angle is it?

right angle

An angle measures 360° . What type of angle is it?

full angle

An angle measures 177° . What type of angle is it?

obtuse angle

An angle measures 180° . What type of angle is it?

straight angle

An angle measures 82° . What type of angle is it?

acute angle

Solutions – Categorising Angles (D)

An angle measures 8° . What type of angle is it?

acute angle

An angle measures 180° . What type of angle is it?

straight angle

An angle measures 90° . What type of angle is it?

right angle

An angle measures 360° . What type of angle is it?

full angle

An angle measures 90° . What type of angle is it?

right angle

An angle measures 256° . What type of angle is it?

reflex angle

An angle measures 177° . What type of angle is it?

obtuse angle

Solutions – Categorising Angles (E)

An angle measures 180° . What type of angle is it?

straight angle

An angle measures 22° . What type of angle is it?

acute angle

An angle measures 45° . What type of angle is it?

acute angle

An angle measures 360° . What type of angle is it?

full angle

An angle measures 241° . What type of angle is it?

reflex angle

An angle measures 90° . What type of angle is it?

right angle

An angle measures 154° . What type of angle is it?

obtuse angle

Solutions – Categorising Angles (F)

An angle measures 14° . What type of angle is it?

acute angle

An angle measures 180° . What type of angle is it?

straight angle

An angle measures 360° . What type of angle is it?

full angle

An angle measures 179° . What type of angle is it?

obtuse angle

An angle measures 45° . What type of angle is it?

acute angle

An angle measures 90° . What type of angle is it?

right angle

An angle measures 272° . What type of angle is it?

reflex angle

Solutions – Categorising Angles (G)

An angle measures 90° . What type of angle is it?

right angle

An angle measures 68° . What type of angle is it?

acute angle

An angle measures 180° . What type of angle is it?

straight angle

An angle measures 360° . What type of angle is it?

full angle

An angle measures 90° . What type of angle is it?

right angle

An angle measures 116° . What type of angle is it?

obtuse angle

An angle measures 205° . What type of angle is it?

reflex angle

Solutions – Categorising Angles (H)

An angle measures 274° . What type of angle is it?

reflex angle

An angle measures 90° . What type of angle is it?

right angle

An angle measures 116° . What type of angle is it?

obtuse angle

An angle measures 360° . What type of angle is it?

full angle

An angle measures 180° . What type of angle is it?

straight angle

An angle measures 6° . What type of angle is it?

acute angle

An angle measures 90° . What type of angle is it?

right angle

Solutions – Categorising Angles (I)

An angle measures 180° . What type of angle is it?

straight angle

An angle measures 90° . What type of angle is it?

right angle

An angle measures 180° . What type of angle is it?

straight angle

An angle measures 360° . What type of angle is it?

full angle

An angle measures 85° . What type of angle is it?

acute angle

An angle measures 336° . What type of angle is it?

reflex angle

An angle measures 97° . What type of angle is it?

obtuse angle

Solutions – Categorising Angles (J)

An angle measures 144° . What type of angle is it?

obtuse angle

An angle measures 181° . What type of angle is it?

reflex angle

An angle measures 55° . What type of angle is it?

acute angle

An angle measures 180° . What type of angle is it?

straight angle

An angle measures 360° . What type of angle is it?

full angle

An angle measures 90° . What type of angle is it?

right angle

An angle measures 238° . What type of angle is it?

reflex angle
